EXHIBIT HALL FLOORPLAN

Booth Information:

Basic Booth 10' x 10'
$3,800

- 2 staff badges per 10x10
- 8’ background drape
- 3’ side rail drape
- 7” x 44” identification sign with company name
- Any booth in premium booth location will be assessed an additional $150 per 10x10

Island Booth 20' x 20' minimum
$15.200+

- $1,000 island fee will be assessed
- Island design needs to be submitted for approval by February.

REMEMBER!

All exhibitors must provide flooring for their booth. Flooring must fit the entire booth footprint.

Exhibitors are responsible for purchasing their own electric and internet access. This can be secured in the Exhibitor Service Kit when it becomes available.

No items, except what is mentioned above will be provided. The exhibitor must secure all booth items through Freeman and/or another service provider

IMPORTANT DATES

September 8 - October 16, 2026

Priority Booth Placement for Exhibitors with 20pts or higher

October 7, 2026

Webinar on Customs / Travel to Canada

- Topics include:
  - Duty-free & tax-free entry of exhibitor display materials
  - Required customs documentation
  - Medical Devices and Equipment
  - Recommended timeline

October 19, 2026

General Booth Placement Begins

February 8, 2027

Island Booth Floorplans & Hanging Signs Due

March 12, 2027

Final Payment is due

- If payment is not received by end of business on March 12, 2027, the exhibitor's booth may be vacated to allow another exhibitor on the waiting list to register.

April 30, 2027

Proof of Insurance

- If providing your own insurance, you must provide COI by this date.
- If not received by this date, you will be issued COI by RainProtection

June 2&3, 2026

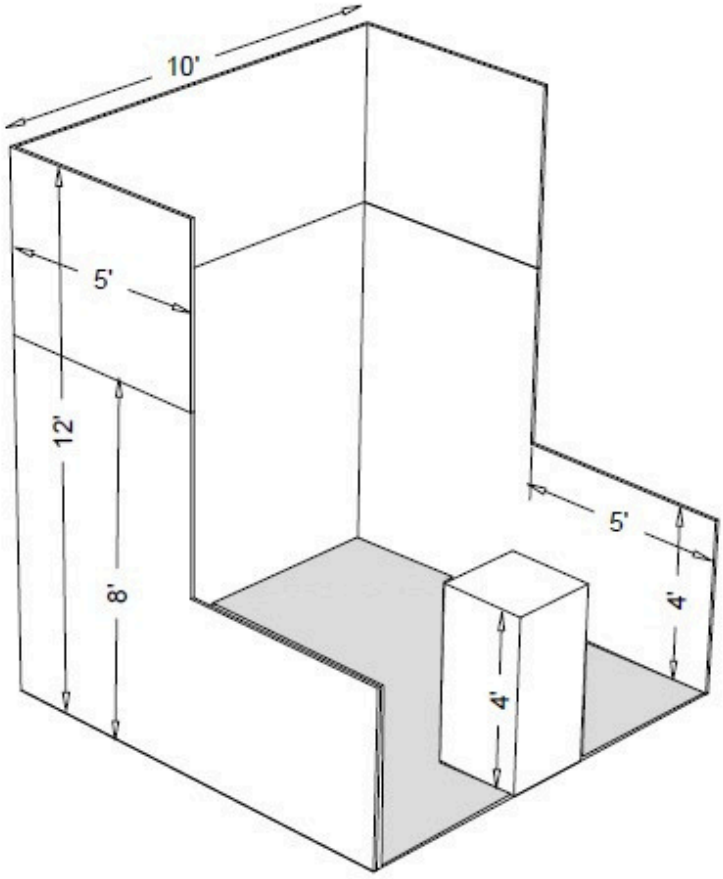

Exhibitor Setup

IN-LINE BOOTH SPECIFICATIONS

10' x 10' Booth

Exhibit displays must be set in a manner so not to block the sightlines of neighboring exhibitors. No display can exceed 8' in height.
All items greater than 4' must be set in the rear of the booth and cannot extend past 5' from the backwall. Items 4' in height or less can be arranged anywhere within the booth space.

Hanging signs are not allowed.

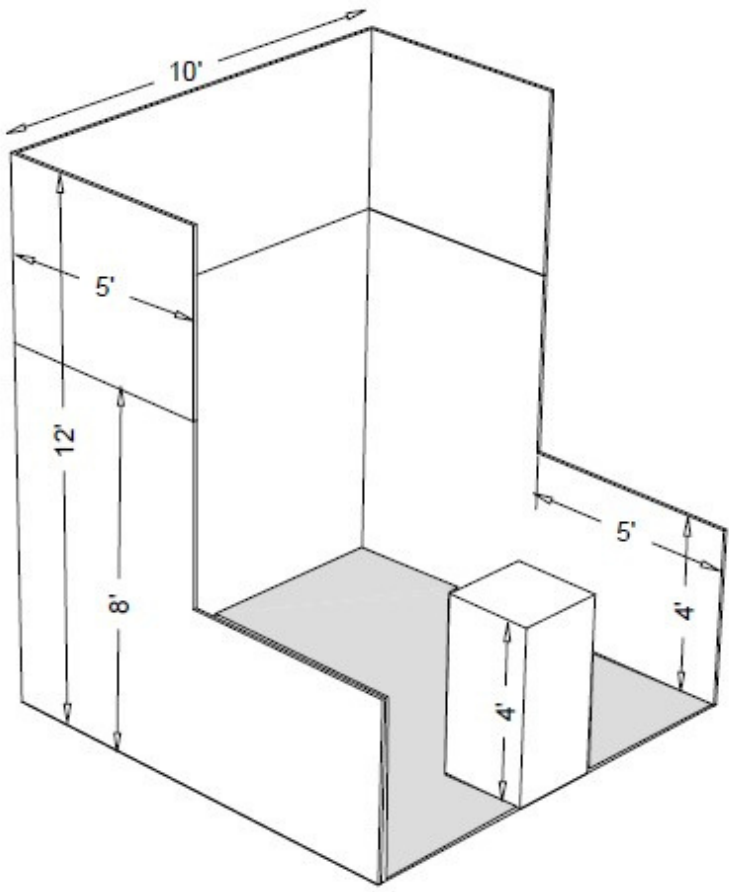

IN-LINE BOOTH SPECIFICATIONS

10' x 10' Perimeter Booth

Exhibit displays must be set in a manner so not to block the sightlines of neighboring exhibitors. The AAO will allow an exhibitor in an in-line booth to extend the height of their display to 12′ if the booth is along the perimeter of the exhibit hall and does not back up to another exhibit.
All items greater than 4′ must be set in the rear of the booth and cannot extend past 5′ from the backwall. Items 4′ in height or less can be arranged anywhere within the booth space.

Hanging signs are not allowed.

ISLAND BOOTH SPECIFICATIONS

To ensure proper site-lines and a positive experience for all exhibitors, the AAO has developed guidelines and requires your assistance with providing the following information:

Island Booth

An island exhibit is a display detached from other displays with aisles on all sides. The height restriction is 20' which includes ground supported structures. Exhibits may extend to the perimeter of the assigned space.

Island booths configured with solid walls exceeding 4' in height on the perimeter will be required to allow at least 50% visibility. Exhibitors may use Plexiglas or similar see-through material to create walls exceeding 4' in height.
Please provide the following detail drawings:

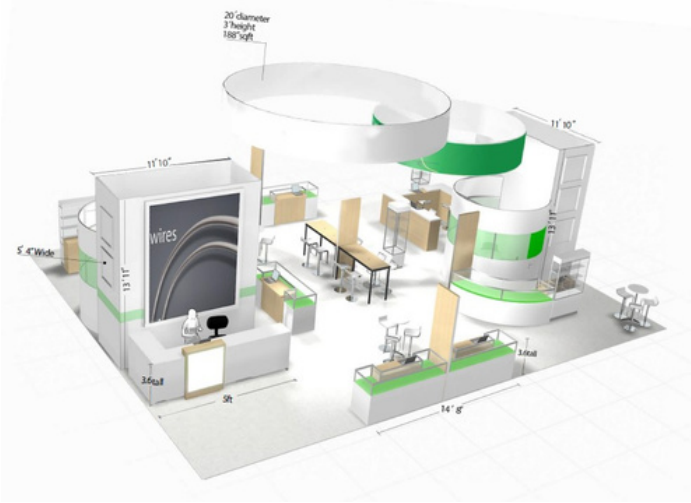

1) Color rendering.
2) Top down view scale floor plan that includes dimensions of booth properties and the distance properties are from the perimeter of the booth.
3) Front elevation that includes height and width of structures.

Please refer to the examples at the end of this document of floor plans and allowable hanging sign/structures.

HANGING SIGNS & STRUCTURES

Hanging signs will be permitted for island booths only. If you plan on hanging a sign, you must fill-in the specs in the island booth form and submit a color rendering of the sign no later than 30 days prior to the first day of move-in.

Total square footage of the hanging sign(s) graphics may not exceed 50% of the assigned space square footage. The top of the sign must not exceed 20' from the exhibit floor. For example, if you have a 400 sq. ft. booth, your sign cannot exceed 200 sq. ft.

Allowable square footage = Rented space X 50%.
Square footage is figured out by multiplying the height X width of the sign.

If you have a circular sign, you will figure out sq. ft. by using this formula: 2 x π x radius x height

Please remember, if you have graphics on both sides of the sign (including inside) - that must be calculated into the total square footage as well.
